Dear Matthew:

I am pleased to report that Better Home Sewerage has nothing but good things to say about EZ Street Cold Asphalt.

We recently purchased EZ Street for two projects that we had to put in temporary asphalt until we completed the final restoration. To my surprise, when I went back to the trenches that we used EZ Street to fill, I found that you could not even tell the difference between EZ Street and Hot Asphalt. I definitely feel that you can apply EZ Street as a final restoration on certain applications, and not be concerned with failure.

Once again, I have nothing but good things to say about EZ Street and would highly recommend other utility contractors to use the product on their projects.

Sincerely,

A handwritten signature in black ink, appearing to read "John Galli", written in a cursive style.
