Subject: Testimonial

At Bolton Council we have tried all the bagged/bucketed pothole solutions over the years and the one product we return to time and time again is the EZStreet Asphalt, we use primarily for ironwork reinstatements – lasts exceptionally well – three years on a slip road onto our busiest road, even hot rolled is falling around manholes on this road quicker than the EZStreet did. We also use it for out of hours emergency potholing it is very good, we have used EZStreet Asphalt for four years and I order a couple of Tonnes at a time lasting us around six months.

Regards,

Sean Croudace
